RTK-NET

The Right-To-Know Network

運営団体

- OMB-Watch
- The Center for Public Data Access

The screenshot shows the RTK-NET website. At the top is a logo with a sun and trees, and the text "RTKNET THE RIGHT-TO-KNOW NETWORK". Below the logo is a "Welcome!" message. To the left is a vertical menu with buttons for "About RTK NET", "Databases", "Resources", "Help", and "Sponsors". The main content area contains a paragraph about the network's purpose, a "System Status" section with a link to "Status" and a note about 1999 TRI data, and a search section titled "Search for toxic pollution in your area!". The search section includes a text input field and a "Search!" button. At the bottom, there is a note about the search scope and a link to the "databases on RTK NET".

Welcome!

The Right-to-Know Network provides free access to numerous databases, text files, and conferences on the environment, housing, and sustainable development. With the information available on RTK NET, you can identify specific factories and their environmental effects; analyze reinvestment by banks in their communities; and assess people and communities affected.

[System Status](#)

[Status](#) (4/24/01 - 4:00pm ET)
1999 TRI Data is now available!

Search for toxic pollution in your area!

Enter your city and state, comma required (e.g. Baltimore, MD):

Note: This search only covers the EPA Toxics Release Inventory (TRI) database.

RTK NET gives you access to a wide variety of information from the TRI and other databases on our site. Check out the [databases on RTK NET](#), run a search or two, and go from there.

DDT Exposure Linked to Premature Births in the 1960s

The heavy use of the pesticide **DDT** in the U.S. prior to 1966 may have produced an epidemic of premature births, according to a recent study. High levels of **DDE**, a breakdown product of DDT, were detected in blood samples from mothers who gave birth to premature or low birth weight infants between 1959 and 1966. Pre-term births are a major contributor to infant mortality.

DDT was identified by Rachel Carson as being a potent reproductive toxin in birds in her pioneering 1962 book, "Silent Spring." Studies since then have strongly suggested the chemical's human reproductive toxicity. (Founded in 1967 to do battle against the spraying of DDT on Long Island, Environmental Defense was instrumental in banning the chemical in the U.S. in 1972.) DDT is still widely used in countries where mosquito-borne malaria is a major public health problem.

Factory Watch

運営団体: Friends of
The Earth - UK

The screenshot shows the 'Factory Watch' website interface. At the top, there is a logo for 'Friends of the Earth' and the title 'FACTORY WATCH'. Below this, a teal bar contains the text 'Find polluters near you'. The main content area is light blue and features a search form with the prompt 'Type your postcode and press Go'. A text input field is present, followed by a 'Go' button. Below the input field, there are radio buttons for 'as a list (quicker)' and 'on a map (nicer)'. To the right of the search form, a text box states: 'Factory Watch gives you the facts about pollution from UK factories and helps you fight for a cleaner, healthier environment. Latest news >'. Below the search form, there are two sections: 'Help and factory pollution' and 'Get more information'. The 'Get more information' section contains a bulleted list: 'The worst factories exposed', 'Pollution and poverty', 'In-depth information', and 'Related links'. At the bottom, a 'Disclaimer' section states: 'Whilst the data held on this site is the best available (and the original data has been provided by companies to the Environment Agency), you should be aware that uncertainties and errors may be present. Friends of the Earth cannot accept responsibility for the consequences of any use of the data.' The footer contains the text: 'Copyright © Friends of the Earth | Contact Us | Support Friends of the Earth'.
